

Hurricane Recovery for the Children of Dominica - 2017

Dominica has always been considered the “Garden of Eden” of the Caribbean, until Hurricane Maria’s Category 5 winds raged through the island - completely destroying all of the trees, plants and 90% of all buildings. Maria has left the island’s 72,000 inhabitants destitute and without basic necessities such as housing, water, food, clothing, electricity and communication with the outside world.

- *The International Center for Assault Prevention (ICAP) at Camden County College* has a Child Assault Prevention (CAP) project in Dominica located at the *East Dominica Children’s Federation*. We are currently asking for help for their children and families. The need is great. As shipping costs are prohibitive, this is a fundraiser and we are asking for a financial gift of any amount. We also appreciate generous contributions because we know more we raise the more children and families will be helped toward recovery.

DONATE AT: www.camdencc.kintera.org/dominica .

All contributions are tax deductible and 100% of your gifts will be going to support the children and families of Dominica CAP/ East Dominica Children’s Federation.

Mail Checks to:
Camden County College
c/o Dominica CAP Recovery
200 College Drive
Blackwood, NJ 08012
